

Stycky Wyck

THE UV BUG CATCHER & NIGHT LIGHT

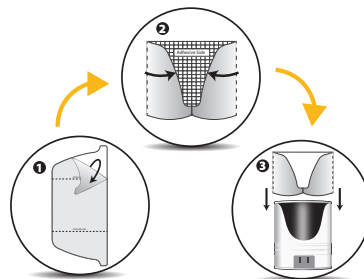

TOP 3 USES

DID YOU KNOW THAT FLIES CAN TASTE ANYTHING THROUGH THE RECEPTORS IN THEIR FEET? DON'T LET THEM ENJOY YOUR MEAL BEFORE YOU DO!

Safe for your home and family, the Stycky Wyck UV Bug Catcher & Night Light provides safe UV light that attracts various flying insects and traps them on the proven Stycky Wyck adhesive insert, which is placed inside the unit.

AS A BUG CATCHER:

1. Peel off the backing of the Adhesive Insert.
2. Fold the insert along the fold lines.
3. Place the insert into the Bug Catcher.
4. Plug into a power outlet.

AS A NIGHTLIGHT:

The sensor on the front of the plugged in Stycky Wyck unit will detect when it is dark in the room and automatically switch the LED Nightlight on. When the area is bright again either by sunlight or if your room lights are on, the LED Nightlight will switch off. The UV light will always remain on.

So even when you're not thinking about it, your Stycky Wyck UV Bug Catcher will always be working. Check the adhesive insert to ensure it is clear of any bugs, monthly. When it fills up, replace the insert with a new one.

STYCKY WYCK IS IDEAL FOR CATCHING MOSQUITOES, HOUSE FLIES & FRUIT FLIES

THE KITCHEN

Our Kitchens often attract flying insects going after your food. It's time you fed them something different. Using Stycky Wyck in your Kitchen can provide a more attractive destination for the common house fly or fruit fly who are lead to your kitchen for other reasons.

THE BEDROOM

Flying insects really have no place in the bedrooms of North America. Yet they always find their way in. Many people choose to use Stycky Wyck in their Bedrooms. It provides a soft night light so you can see your way around if you happen to wake up in the middle of the night. It is great to reduce the amount of mosquito bites you get over the summer months.

THE BATHROOM

The moisture created in our bathrooms create an atmosphere ripe for pests that love water. Especially mosquitoes. A Stycky Wyck Bug Catcher in the bathroom can give mosquitoes something else to focus on while you get your business done. Another plus to this is that when it gets dark at night, Stycky Wyck also becomes a Nightlight. So you can see your way around the bathroom whether you hit the light switch or not.
